

Andrea Campos

Experienced software engineer specializing in front-end development of web applications, from early startup stage size to established apps with millions of users per day

Work Experience

Intuit

Senior Software Engineer | Mar 2024 - Present

- Front end development on customer-facing features of Quickbooks
- Migrate Proper Finance frontend codebase to internal Intuit micro-frontend architecture and document requirements for productionization
- Modernization of less-maintained codebases to remove outdated technologies, leverage new components/patterns and increase code coverage

Proper Finance

Senior Software Engineer | Jan 2023 - Mar 2024

- Front end development of features and complex workflows to onboard and reconcile financial data in close collaboration with back-end engineers, designers and product
- Implementation of "Sparkle" data cleanup/transformation UI tool for imported CSV file and database data
- Promotion and implementation of design component library for faster and more consistent development

Twitter

Senior Software Engineer | Jul 2021 - Jan 2023

Software Engineer | Jul 2019 - Jul 2021

- Development of features including DM enhancements, "Health" initiatives like misinformation labeling and feature development platform improvements
- Served as technical lead for pod of "Health" web engineers working on features to improve platform safety and security
- Leader in the web hiring group that spearheaded new coding challenge and standardized hiring rubrics for front end engineers

Marqeta

Software Engineer | Oct 2017 - May 2019

- Full-stack development on public and internal facing Rails web applications, PCI-compliant widget and Javascript library, internal SDKs and component libraries
- Work on multiple teams that cross-collaborate among engineers, PMs, designers and product stakeholders

Aspera, an IBM Company

Software Engineer | Mar 2017 - Oct 2017

Knowledge Base Engineer | Oct 2015 - Jul 2017

Technical Writing Intern | Apr 2015 - Oct 2015

- Fullstack development on Rails web applications, including adding major new features, fixing critical bugs, implementing interaction/visual design and 508 accessibility compliance
- Development of public and internal tools for the Support team and authoring over 450+ knowledge base articles for software applications on the Aspera Support site for both public and internal audiences
